

WHAT IS CLAIMED IS:

1. A shoe cover for protecting a shoe, comprising:
 - a uniform material placeable over a front portion of a shoe, the uniform material having a left and right side;
 - a plurality of slits on both the left and right sides of the uniform material; and
 - a lace woven through the slits for affixing the shoe cover to the front portion of the shoe.
2. The shoe cover of claim 1, wherein the material comprises plastic.
3. The shoe cover of claim 1, wherein the slits appear in pairs on both the left and right sides, and wherein the lace is woven in and out of each pair on each side.
4. The shoe cover of claim 1, wherein the material is U-shaped to fit over the top and sides of the shoe.
5. The shoe cover of claim 1, wherein the material is of uniform thickness.
6. A shoe cover for protecting a shoe, comprising:
 - a uniform material placeable over the front portion of a shoe, the uniform material having a left and right side;
 - a plurality of slits on both the left and right sides of the uniform material;
 - a plurality of straps each having loops on its ends, wherein the ends of each strap are respectively positioned through at least one slit on the left and at least one slit of the right side of the uniform material; and
 - a lace woven through the loops for affixing the shoe cover to the front portion of the shoe.
7. The shoe cover of claim 6, wherein the material comprises plastic.

8. The shoe cover of claim 6, wherein the slits appear in pairs on both the left and right sides, and wherein the ends of the straps are woven in and out of each pair on each side.
9. The shoe cover of claim 6, wherein the material is U-shaped to fit over the top and sides of the shoe.
10. The shoe cover of claim 6, wherein the material is of uniform thickness.
11. An improved shoe system, comprising:
 - a shoe; and
 - a shoe cover positioned over a front of the shoe, the shoe cover comprising:
 - a uniform material having a left and right side;
 - a plurality of slits on both the left and right sides of the uniform material; and
 - a lace woven through the slits and around an underside of the shoe for affixing the shoe cover to the front portion of the shoe.
12. The system of claim 11, wherein the material comprises plastic.
13. The system of claim 11, wherein the slits appear in pairs on both the left and right sides, and wherein the lace is woven in and out of each pair on each side.
14. The system of claim 11, wherein the shoe comprises cleats on the underside of the shoe, and wherein the lace is woven between the cleats on the underside of the shoe.
15. The system of claim 11, wherein the material is U-shaped to fit over the top and sides of the shoe.
16. The system of claim 11, wherein the material is of uniform thickness.

17. An improved shoe system, comprising:
 - a shoe; and
 - a shoe cover positioned over a front of the shoe, the shoe cover comprising:
 - a uniform material having a left and right side;
 - a plurality of slits on both the left and right sides of the uniform material;
 - a plurality of straps each having loops on its ends, wherein the ends of each strap are respectively positioned through at least one slit on the left and the right side of the uniform material and around an underside of the shoe; and
 - a lace woven through the loops for affixing the shoe cover to the front portion of the shoe
18. The system of claim 17, wherein the material comprises plastic.
19. The system of claim 17, wherein the slits appear in pairs on both the left and right side, and wherein the ends of the straps are woven in and out of each pair on each side.
20. The system of claim 17, wherein the shoe comprises cleats on the underside of the shoe, and wherein the lace is woven between the cleats on the underside of the shoe.
21. The system of claim 17, wherein the material is U-shaped to fit over the top and sides of the shoe.
22. The system of claim 17, wherein the material is of uniform thickness.
